C 17 New Parallel Algorithms Of The Standard Template **FREE* c 17 new parallel algorithms of the standard template* The idea is quite simple. The Standard Template (STL) has more than 100 algorithms for searching, counting, and manipulation of ranges and their elements. With C++17, 69 of them are overloaded and a few new are added. The overloaded and new algorithm can be invoked with a so-called execution policy. By using the execution policy, you can specify whether the algorithm should run sequential, parallel, or parallel and vectorized.
